Packing List Fields

Type of pack, dimensions and weight on delivery orders and on the printed packing list

Packing List Fields is an Odoo 19 app that adds Type of Pack, dimensions and weight to delivery orders under Shipping Information. The values print on the Packing List / Delivery Slip report, so customers and carriers get complete shipping documents.

Technical name flexcode_packing_list_fields · one-time price for Odoo 19.0; each Odoo version is bought separately

At a glance

Category	Inventory & Purchase	Odoo versions	Odoo 19.0

Price	34,30 € one-time · Odoo 19	Support	90 days free support from FlexCode

KEY FEATURES

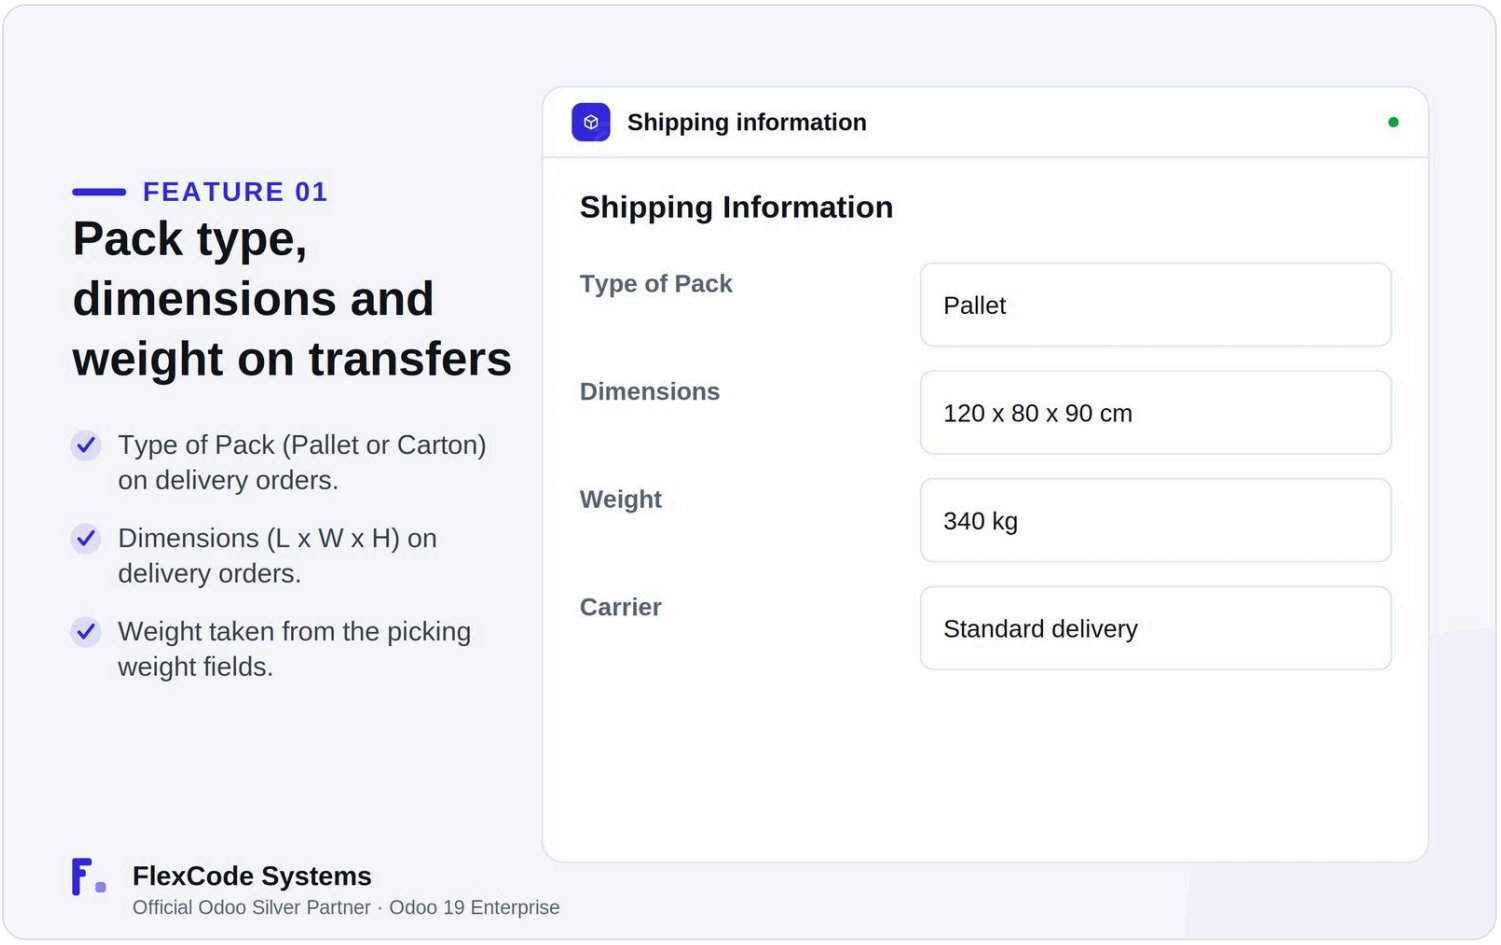
Packing details on every delivery order · Printed where it counts · Simple setup

The problem

Delivery slips often miss the packing details that customers and carriers ask for. Is it a pallet or a carton, how big is it, how much does it weigh? Warehouse staff write it on the

paperwork by hand or answer the questions by phone and email, and shipping errors creep in.

What it does



Shipping Information on the delivery order: type of pack, dimensions and weight. Illustration from the store listing.

Packing details on every delivery order

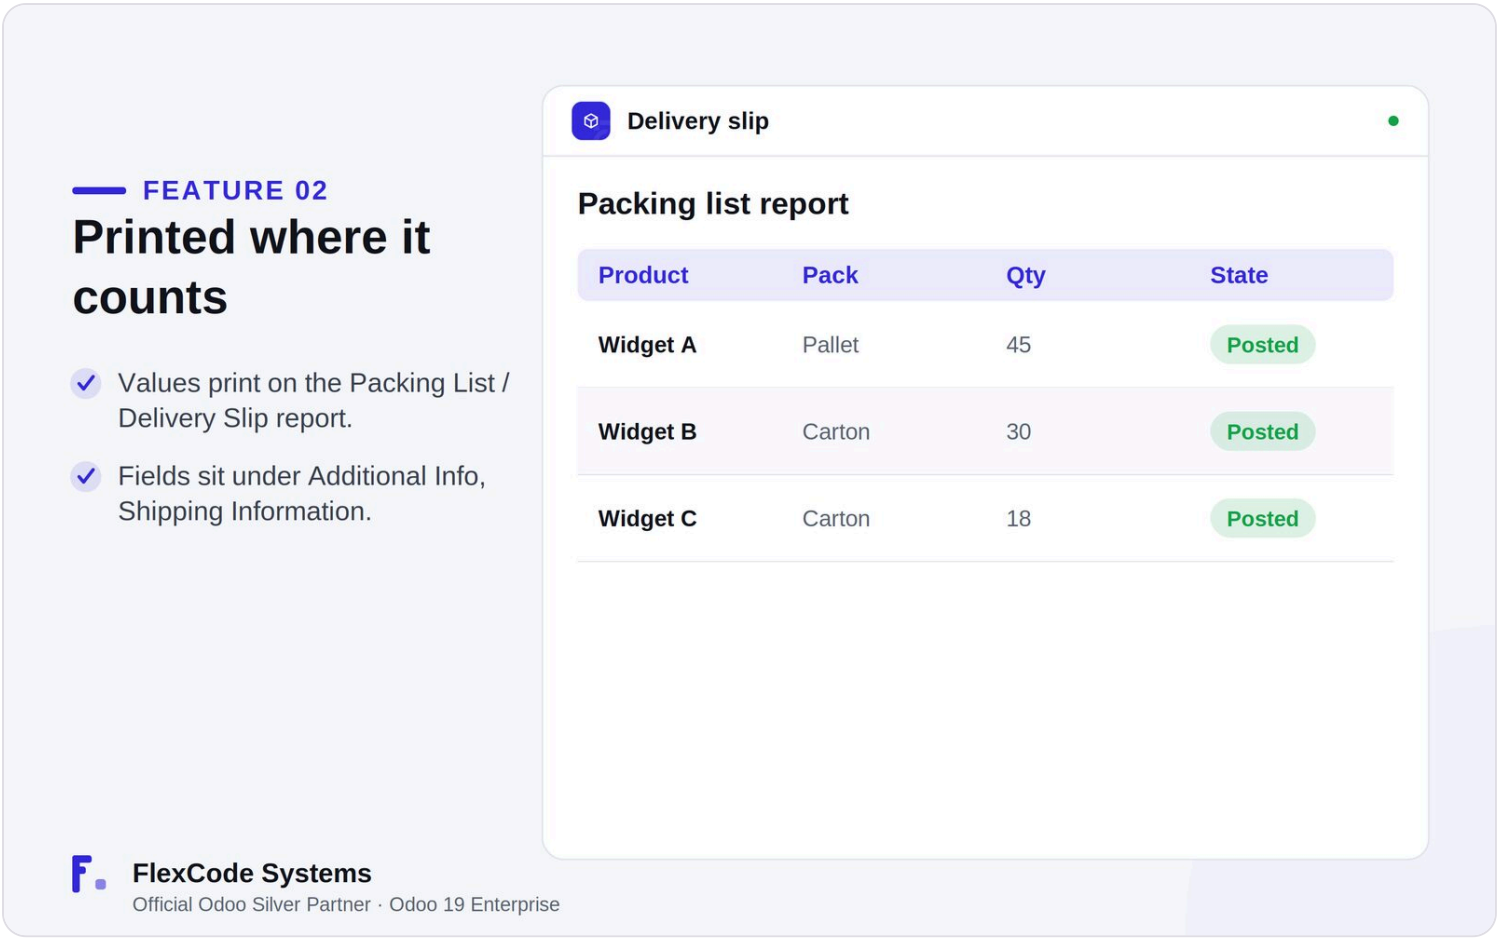
- Set the **Type of Pack** (pallet or carton) on delivery orders.
- Enter the dimensions as length x width x height.
- Print the weight from the picking weight fields, with no double entry.

Printed where it counts

- Print type of pack, dimensions and weight on the **Packing List / Delivery Slip** report.
- Find the fields on the transfer under Additional Info, Shipping Information.

Simple setup

- Start with nothing to configure.
- Use pallet and carton as Type of Pack values out of the box, and configure further values when you need them.



The printed packing list with the pack type per line. Illustration from the store listing.

Who it is for

- Warehouse and shipping teams preparing deliveries.
- Companies that ship pallets and cartons with size and weight.
- Businesses that need complete packing lists for carriers.
- Anyone printing delivery slips from Odoo 19.

NOT A FIT WHEN

- Databases on Odoo Online (SaaS), which cannot install third-party apps.
- Odoo Community: the app is built and tested for Odoo 19 Enterprise.

Install

Requires: **Inventory (stock)**, **Invoicing (account)**, **Discuss (mail)**

1. Buy the app on the Odoo Apps Store for Odoo 19.0.
2. Add the module to your Odoo.sh project or to the addons path of your on-premise server.
3. Update the apps list in Odoo and install Packing List Fields. Missing dependencies are installed with it.

> Odoo Online (SaaS) does not allow third-party apps, so Packing List Fields cannot be installed there. Use Odoo.sh or an on-premise Odoo 19 Enterprise database.

Configure

1. Install the app. The new fields appear on delivery orders under Additional Info, Shipping Information.
2. Use pallet and carton as Type of Pack values out of the box, or configure further values if your shipments need them.

SETTING	WHAT IT DOES
Type of Pack	How the delivery is packed, for example pallet or carton. The values are configurable.
Dimensions	Length x width x height of the package, entered on the delivery order.
Weight	Printed from the picking weight fields, so it is not entered twice.

How to use it

Record the packing details and print the slip

1. Open the delivery order and go to Additional Info, Shipping Information.
2. Set the type of pack and the dimensions. The weight comes from the picking weight fields.
3. Print the packing list or delivery slip. Type of pack, dimensions and weight appear on the document.

Limits

- The printed weight is only as accurate as the weight on the transfer.
- It cannot be installed on Odoo Online (SaaS).
- It is built and tested for Odoo 19 Enterprise. The price covers one Odoo major version.

Frequently asked questions

How do I add dimensions and weight to the Odoo delivery slip?

Install Packing List Fields. Enter the type of pack and the dimensions on the delivery order under Shipping Information, and the packing list and delivery slip print them together with the weight.

Can I set pallet or carton as the type of pack in Odoo?

Yes. Packing List Fields adds a Type of Pack field with pallet and carton out of the box, and the values are configurable.

Where does the weight on the packing list come from?

From the picking weight fields of the transfer, so there is no double entry.

Where do I enter the packing details?

On the delivery order, under Additional Info, Shipping Information.

Which Odoo versions and editions does Packing List Fields support?

It is built and tested for Odoo 19 Enterprise, on-premise and on Odoo.sh. Odoo Online does not allow third-party apps. The price is one-time per Odoo major version.

Does Packing List Fields modify Odoo core?

No. It is clean code with no core monkey-patching and no migration scripts.

Need it set up or adapted?

We configure our apps for your process, train your team and build the extra pieces you need. Every purchase includes 90 days of free support from FlexCode Systems. Questions: info@flexcodesys.com
